29L Portable Fuel Tank

Product price:

£44.99 tax included

Product description:

Fuel tank made of high-quality, corrosion-resistant polyethylene (PE-HD) plastic. Meets the highest safety standards. A practical safety cap with locking device protects against accidental opening. The hose includes a venting system that allows the tank to be filled even on board, as well as a leak stop device that further improves safety during refuelling. The filling hose must be reinserted into the canister during refuelling. When there is no longer any back pressure in the hose, the valve closes and the fuel cannot escape in any way. It has a quality certificate. Suitable for E10 fuel.

Dimensions: Height 510 mm - Width 230 mm - Length 365 mm.

Capacity: 29 litre

Product short description:

The 29L Portable Fuel Tank is a must-have for boating enthusiasts seeking reliability and convenience on the water. Designed with a durable, UV-stabilized polyethylene material, this fuel tank ensures longevity and resistance to rough marine conditions, while its compact form optimizes deck space without compromising fuel capacity.

- 29-litre capacity suitable for extended trips
- Equipped with a high-flow fuel cap for easy refueling
- Integrated fuel gauge for easy monitoring of fuel levels
- Ergonomic carry handle for comfortable transportation
- Anti-static, flame-retardant construction for enhanced safety
- Compatible with most outboard engines and fuel connectors

- Meets international safety standards for marine fuel tanks
