NGK IZFR5G

Product price:

£18.78 tax included

Product description:

Iridium plug, 14mm, 3/4" reach, 5/8" hex, gasket seat, inductive resistor, ISO length, projected extended tip, extremely long life plug, iridium center electrode with platinum tipped ground electrode NGK iridium plugs represent the ultimate evolution of spark plug technology and performance. The iridium center electrode is both stronger and harder than platinum. This tapered cut iridium center electrode reduces the voltage requirement for spark. This allows for a brighter, stronger spark from your existing ignition system. A platinum tipped ground electrode further contributes toward the extreme longevity of this plug.
