Marine 16 Diesel Bug Treatment

Product price:

£15.82 tax included

Product description:

Diesel bug treatment is a biocide blend formulated especially for preventing or eradicating the fuel spoilage organisms known collectively as diesel bug.

A 100ml bottle is sufficient to prevent diesel bug growth in 2000 ltrs of fuel. For serious contamination addition rates of 100ml to 100 ltrs may be required. Diesel bug treatment disperses into both the water and fuel phases in your tank and will remain sufficiently active for over a year at both high and low temperatures. Marine 16's Diesel Bug Treatment is the fuel treatment of choice for the RNLI,

The Royal Marines, Sea Start and River Canal Rescue as well as being number 1 in the Practical Boat Owner magazine review.
