Marine High Performance Gear Oil 85W-90

Product price:

£11.99 tax included

Product description:

Special high-performance gear lube for the maritime sector. With unique package of additives that guarantees outstanding wear protection even in the case of contamination with water. Stable under extreme pressures even under high stresses and at high speeds. Offers outstanding corrosion protection and very good oxidation resistance.

Meets the requirements of common transmission manufacturers in the marine sector. For Mercury outboard motors as of 75 hp output as well as MerCruiser Z-drives. Can be used as a replacement for a high-performance gear lube with viscosity SAE 90.

Application

Note the boat and transmission manufacturers' operating instructions. Cannot be mixed with oils of other specifications.

Product codes:

Reference: LM25079
EAN13: -

Product short description:

Special high-performance gear lube for the maritime sector. With unique package of additives that guarantees outstanding wear protection even in the case of contamination with water. Stable under extreme pressures even under high stresses and at high speeds. Offers outstanding corrosion protection and very good oxidation resistance.

- excellent high-pressure and wear protection properties
- outstanding corrosion protection
- high pressure-absorption capability
- excellent viscosity/temperature properties
- stable to ageing and stable viscosity
