# Aspen 4 Alkylate Fuel 5L - Counter Collection Only

**Product price:**

£29.95 tax included

**Product description:**

Aspen 4 is alkylate petrol without oil – suitable for 4-stroke engines. Ordinary petrol contains ethanol which attracts moisture and can cause engine failures. Aspen Alkylate Petrol contains no ethanol, making it ideal for use in marine environments. To minimise the environmental impact, choose a biodegradable oil.

Aspen 4 is virtually free from harmful substances such as benzene, aromatic hydrocarbons or olefins; substances that can cause serious health problems. Aspen Alkylate Petrol also keeps the spark plugs and combustion chamber of your machine cleaner.

Aspen can be stored for a long time without any deterioration in quality, which makes your engine easy to start – even after long standstill periods. There are numerous environmental benefits, such as reducing the formation of ground-level ozone (smog) by about 40%.

**Product codes:**

Reference: ASP-4
EAN13: -
UPC: - MPN: -

**Product short description:**

Aspen 4 is alkylate petrol without oil – suitable for 4-stroke engines.

- No expensive repair bills caused by stale fuel
- Your engine always starts and is ready to go, even after long standstill periods
- Lasts for years without deterioration
