Product short description:

The Yanmar Engine Coolant -40°C 1L is a premium coolant specifically designed for marine engines, ensuring optimal performance and protection for your boat's engine even in extreme climates. This high-quality formula provides excellent corrosion resistance, preventing damage to engine parts and prolonging the life of your marine engine. Perfect for mariners seeking reliability and efficiency, this coolant is ready to deliver superior thermal stability and engine cooling.

- Protects engines in temperatures as low as -40°C
- Tailored for marine applications
- Provides exceptional corrosion resistance
- Enhances engine longevity and performance
- Ensures superior thermal stability
- Easy to use 1L bottle size
