24L Portable Fuel Tank

Product price:

£35.99 tax included

Product description:

Fuel tank made of high-quality, corrosion-resistant polyethylene (PE-HD) plastic. Meets the highest safety standards. A practical safety cap with locking device protects against accidental opening. The hose includes a venting system that allows the tank to be filled even on board, as well as a leak stop device that further improves safety during refuelling. The filling hose must be reinserted into the canister during refuelling. When there is no longer any back pressure in the hose, the valve closes and the fuel cannot escape in any way. It has a quality certificate. Suitable for E10 fuel.

Dimensions: Height 460 mm - Width 230 mm - Length 340 mm.

Capacity: 24 litre

Product short description:

Introducing the 24L Portable Fuel Tank, an essential companion for any boating adventure. This durable and reliable fuel tank is designed specifically for marine use, ensuring your vessel has the power it needs for extended trips on the water. Constructed with high-quality, impact-resistant materials, it provides a safe and efficient way to store and transport fuel. Its user-friendly design includes a secure cap and a convenient carry handle, making refueling your boat a breeze.

- **Capacity:** 24 liters, perfect for long sailing trips
- **Material:** Impact-resistant and corrosion-proof construction
- **Design:** Ergonomic handle for easy portability
- **Safety:** Secure, leak-proof cap and vented for pressure regulation

- **Compatibility:** Suitable for most outboard engines
- **Convenience:** Clear measurement markings for quick fuel level checks
- **Stability:** Stable base reduces tipping while on board
