Strike - Bluefin Lace Sneaker

Product price:

£74.95 tax included

Product description:

A lightweight performance sneaker, it features advanced traction, rapid drainage, and a secure lace up design. Its upper is made from breathable SEAQUAL® YARN, utilising upcycled marine plastic to help combat ocean plastic pollution. A TPU toe bumper offers added protection, while the versatile design maintains comfort during extended time on the water. An EVA midsole enhances stability and grip, while the outsole, powered by Solum BioTread™, delivers multi-surface grip and slowly releases plant-based nutrients back into the environment as they wear.
