10L Portable Fuel Tank

Product price:

£31.84 tax included

Product description:

Fuel tank made of high-quality, corrosion-resistant polyethylene (PE-HD) plastic. Meets the highest safety standards. A practical safety cap with locking device protects against accidental opening. The hose includes a venting system that allows the tank to be filled even on board, as well as a leak stop device that further improves safety during refuelling. The filling hose must be reinserted into the canister during refuelling. When there is no longer any back pressure in the hose, the valve closes and the fuel cannot escape in any way. It has a quality certificate. Suitable for E10 fuel.

Dimensions: Height 345 mm - Width 295 mm - Depth 165 mm.

Capacity: 10 litres.
