# Fortress K Hitchlock

**Product price:**

## £133.99 tax included

**Product description:**

The SAS Fortress K hitchlock (FORT K) is the fourth hitchlock in the series of Fortress hitchlocks. The FORT K combines quality, security and simplicity into one giving you peace of mind. The SAS hitchlock covers the hitch head and bolts henceforth giving the hitchlock maximum security and meaning no thief can get their hands on your hitch

- The FORT K hitchlock fits the Albe cast head, Knott braked pressed head and Knott unbraked pressed head, may require removal of stand. It also fits the Winterhoff WW8, WW13 & WW30 cast hitch.
- For unbraked trailers with the hitch to fit this hitchlock, the total height from the top to the bottom of the fixing bolt can be no more than 73mm to fit. The way the hitch is mounted on the drawbar causes this. If the bolts on the hitch are too long, you can grind them down to fit as necessary.

- This hitchlock fits on some Ifor Williams trailers and other unbraked trailers, where the maximum height of the hitch, including bolts and drawbar is 73mm. The bolts can be trimmed down to suit, as long as there is a couple of threads exposed from the nut.
- This insurance-approved product ensures you complete peace of mind.
- The design of the Fortress K hitchlock ensures it fits both hitched and unhitched configurations. This therefore prevents the car and caravan from separating in a car park or motorway service station.
- Equipped with maximum security features, the hitchlock includes twin hardened pins for enhanced locking. It also includes anti-drill protection to stop thieves from getting at your vehicle.
- SAS paints the hitchlock bright red to maximize visual deterrence.. Therefore, this deters thieves at the sight of your super secure trailer.
- Compact and easily stored, this product is not only convenient but also comes with an available hitchlock carry case for purchase; further details are provided below.
