SAS Multi-Purpose 6mm Chain with UB50 Padlock

Product price:

£22.99 tax included

Product description:

The General Purpose 6mm Chain and UB50 Padlock offers an ideal blend of strength and convenience. This SAS multi-purpose chain is light enough to handle easily, yet it remains incredibly strong and secure. It fits perfectly for tools, bikes, trailers, or machinery when in storage or overnight.

The chain measures 1 metre long and is made from 6mm hardened steel. Additionally, a protective cloth chain cover prevents scratches and improves grip in cold weather. This covering protects your ground anchor or docking station from damage, helping to keep your security setup in top condition.

The UB50 50mm brass padlock adds another layer of tough protection. It comes with three keys for convenient access. The heat-treated hardened steel shackle resists cutting and tampering and the double locking mechanism ensures the padlock stays firmly locked at all

times.
